

**FOR IMMEDIATE RELEASE**

## **CHEMSPEC USA LAUNCHES NEW READY-TO-SPRAY UV PRIMER**

**ORRVILLE, OH – APRIL 2009** – ChemSpec USA announces the launch of Metalux 2™ 9742™, a ready-to-spray UV Primer, that offers minimal waste and cures in two minutes using an appropriate UV lamp. This primer offers excellent adhesion as well as hardness/flexibility while producing a solvent-resistant film that is superior to many of the traditional acrylic polyurethane primers.

This UV Primer will get the job done. It has the versatility to be applied to many different surfaces and offers ultra high-build capabilities. This product is easy to sand while providing maximum color holdout with no shrinkage of film after cure. The surface is dry after exposure which means no wiping of residue before sanding.

Featuring a broad range from their Metalux2™ Premium International Refinish system to their Big Sky® Specialty Refinish products, and the new Hydrolux™ Waterborne system, ChemSpec employs the latest technology to manufacture outstanding products for the automotive, fleet and industrial markets at very competitive prices. For more information, call 800-328-4892 or email [sales@chemspecpaint.com](mailto:sales@chemspecpaint.com).
